

Jane Tester

FULLSTACK SOFTWARE ENGINEER

jane.test@example.com | GitHub: github.com/janetester | LinkedIn: linkedin.com/in/janetester

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in Node.js backend development, building high-performance REST APIs, and optimizing MongoDB database solutions. Experienced in designing scalable server-side architectures, implementing secure authentication systems, and collaborating across frontend and backend technologies to deliver seamless web platforms.

CORE EXPERTISE

JavaScript • Node.js • Express • React • MongoDB • Tailwind CSS

PROFESSIONAL EXPERIENCE

Junior Developer

Jun 2024 - Present

CodeCrafters, San Francisco, CA

Engineered and optimized robust, scalable REST API endpoints using Node.js and Express to support core platform features.

- Architected and implemented secure user authentication systems, ensuring data integrity and secure access control.
- Utilized testing suites to validate core endpoints, improving overall code quality and reducing production bugs.
- Collaborated closely with frontend engineers to integrate responsive user interfaces with backend services.

SELECTED PROJECTS

PlaceMate Dashboard [React, Express, MongoDB]

[placemate.tech](#)

- Developed a full-stack job matching dashboard using React, Express, and MongoDB, streamlining the application process for users.
- Designed and optimized MongoDB database schemas, utilizing indexing to improve query performance and reduce response times.
- Implemented comprehensive testing for both backend APIs and UI components to ensure high reliability and seamless user experience.

EDUCATION BACKGROUND

B.Tech

2022 - 2026

Stanford University in Computer Science
